REASON

What is the reason for not joining e164.arpa?

Country code not delegated in e164.arpa

e164.arpa. not operational

other reason, please specify: we need an independent tree, reserved by some Communities (e.g., GEANT), to have virtual numbers used for Internet communication only (e.g., VoIP, Vconf).

What are the plans concerning e164.arpa in your country? Is there a "roadmap" for starting an ENUM trial (or commercial service) under e164.arpa?

I/We hereby declare that all information provided above are correct. We further declare that we have read the trial charter, and that we are going to comply with it.
